

Burlington Post

MULTIFAMILY

Burlington Post is an 88-unit affordable 55+ community in St. Petersburg, Florida, designed as a five-story urban infill podium with a bold contemporary façade and a resident-focused site plan in historic Kenwood.

Interior design reinforces the project's active-senior positioning through accessible lounge, library, and education spaces with warm wood, durable finishes, and biophilic accents. The clubhouse and business center, game and garden amenities, and accessibility-focused residential features serve as representative highlights of a broader program supporting independent, community-based living.
