

Aston at Uptown

MULTIFAMILY

Aston at Uptown's interior design was conceived to elevate the amenity experience through a hospitality-inspired environment tailored to young professionals and urban renters. Industrial architectural cues are softened with warm wood tones, jewel-toned accents, textured finishes, and geometric detailing, creating a layered material palette that feels refined, energetic, and distinctive to the market.

Programming was intentionally organized around high-impact resident spaces including coworking areas, lounge settings, gaming amenities, and strong visual connections to the pool courtyard. This supports productivity, social interaction, and everyday use while reinforcing the project's overall identity and value.
