

Axio at Carillon

MULTIFAMILY

At Axio at Carillon, the amenity interiors use rich blues, sandy neutrals, graphic wall treatments, and polished contemporary finishes to translate the project's coastal setting into a stronger market identity.

Representative highlights include the main lounge, co-working or dining-style social area, and the arrival volume, creating a branded hospitality experience that supports the community's premium studio, one-, and two-bedroom product without attempting to inventory the full amenity package.
